

SPACE XRP

Official Whitepaper

Issuer of SpaceXRP: SpaceXRP Labs Ltd.

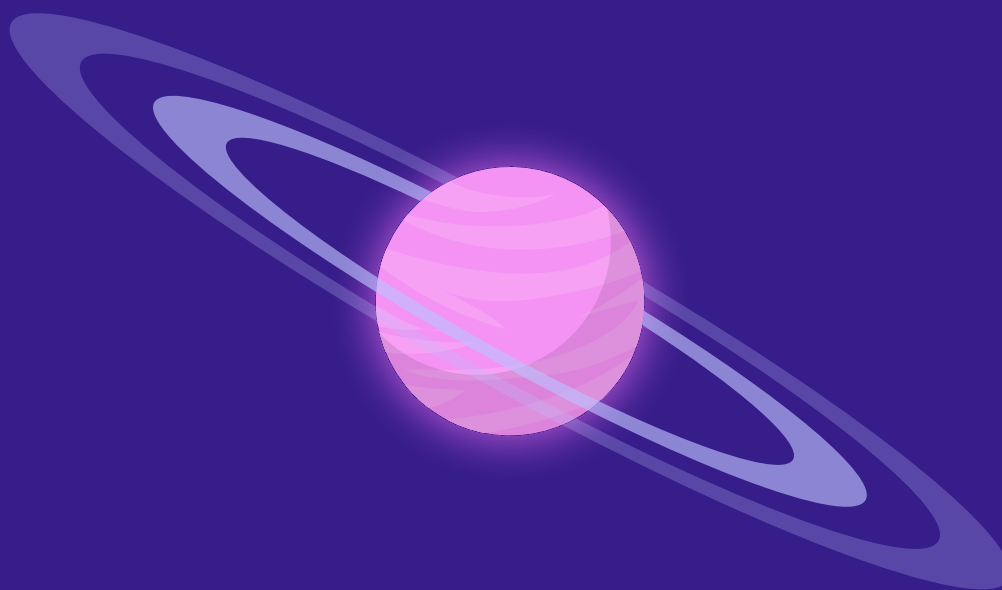

This crypto-asset whitepaper has not been approved by any competent authority in any Member State of the European Union. The offeror of the crypto-asset is solely responsible for the content of this crypto-asset whitepaper.

Whitepaper released on 09/09/25 and last updated on 26/09/25.

ABSTRACT

SpaceXRP (\$SPACEGRP) is a meme-powered token built around Dripple, the astronaut doge who flips "Boosters On" whenever XRP makes headlines. Each surge in the news cycle launches new missions, contests, NFT drops, and community activations – with \$SPACEGRP holders earning rewards through quests, staking, and collectibles.

\$SPACEGRP isn't just another meme coin. It combines Ethereum's infrastructure with XRP's momentum, rewarding loyal community members through quests, staking, and collectibles. This whitepaper sets out the project vision, roadmap, tokenomics, technical design, and risk disclosures.

SpaceXRP Labs Ltd. confirms that, to the best of the knowledge of the management body, the information presented in this crypto-asset whitepaper is fair, clear, and not misleading, and the crypto-asset whitepaper makes no omission likely to affect its import. The prospective holder should base any decision to purchase SpaceXRP Token on the content of the whitepaper as a whole. The offer of SpaceXRP Token does not constitute an offer or solicitation to purchase financial instruments; any such offer would require a prospectus under applicable law. This whitepaper does not constitute a prospectus under Regulation (EU) 2017/1129.

Information on the Project

The Challenge

Most meme coins burn out quickly, relying on short-lived hype cycles. Communities seek projects with staying power, shared culture, and transparent mechanics. At the same time, XRP often dominates news headlines – but there has been no meme coin that fully harnesses this attention.

The Solution

Enter SpaceXRP: where Ethereum is the launchpad, XRP is the fuel, and Dripple is the pilot. Each time XRP wins in the news cycle, Dripple “does zoomies”, fetching memes, quests, and rewards for the community. This design makes SpaceXRP reactive, sticky, and community-powered rather than just another static meme coin.

Key Features

News-Reactive Missions – “Boosters On” events triggered by XRP headlines.

Staking Dock – Holders can stake \$SPACEXRP for dynamic rewards.

NFT Collection – Unique Dripple drops for the most loyal community members.

Airdrop Quests – Engagement-based activities with multiplier points.

Community Governance – Holders help decide missions and features.

Dripple's Story

Long ago, before the markets turned cosmic, there was a pup who loved to chase signals. Every bark, every ripple on the water, caught his attention. One night, staring up at the stars, he dreamed of following those ripples beyond Earth. With a patched-up rocket and a heart full of zoomies, Dripple blasted off. His boosters only fire when XRP makes waves across the galaxy – news, wins, and breakthroughs fuel his journey. Ethereum serves as his sturdy launchpad, but XRP is the spark that lights his engines.

Now, Dripple roams the stars fetching memes, drops, and contests from orbit and bringing them back to his community on Earth. When the call goes out – “Boosters On!” – Dripple answers, dodging asteroids of FUD and guiding holders toward missions, staking docks, and NFT treasures. He isn't just a mascot; he's the good boy astronaut leading SpaceXRP into new orbits of fun, loyalty, and community.

ROADMAP

1

PUPPY HAS LIFTOFF

- SpaceXRP site launched
- \$XRPUP security audit completed
- Presale & Treat Dock (staking) opens
- Social media signal goes live

DOGGY'S FIRST ORBIT

2

- Barkcaster online: XRP news ticker
- Daily Bark Quests tied to headlines
- TGE & Claim: \$XRPUP liquidity locked
- Signal boost: Marketing ramps up
- Boosters On event boosts activated, triggered by major XRP headlines

3

INTERSTELLAR ZOOMIES

- Quests 2.0: Co-op raids, seasonal ladders
- Introduce Orbit Points (cross-activity reputation)
- XRover collectibles: First NFT/gear drop
- Ecosystem growth: Partnerships/integrations
- Chain Expansion: Add a second chain/bridge

Technical Information

Token Standard: \$SPACEGRP is an ERC-20 token on Ethereum's Proof-of-Stake chain.

Smart Contracts: Govern presale, staking pools, and NFT reward mechanics.

NFTs: Dripple collectibles deployed as ERC-721 / ERC-1155 contracts.

Presale Mechanics: Purchase using ETH, BNB, USDT, USDC, or card. Option to stake during presale.

Claiming: Tokens claimable after TGE and liquidity launch. Wallet integration through Best Wallet.

Security: Smart contracts subject to third-party audits before launch.

Token Utility & Access

Holding \$SPACEGRP unlocks:

Staking: Dynamic rewards via staking pools.

NFT Rewards: Priority access to Dripple NFT drops for loyal participants.

Social Multipliers: Points toward quest leaderboards.

Governance: Voting on future missions and integrations.

Community Drops: Airdrops, contests, and themed giveaways.

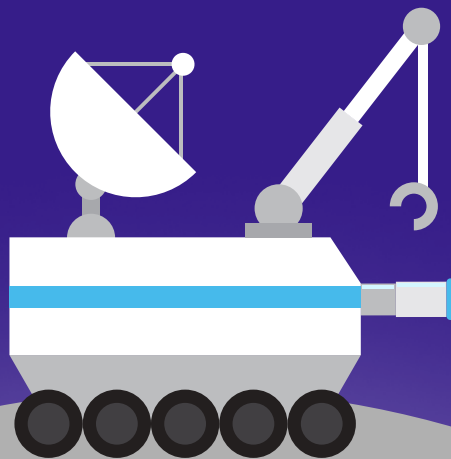

Environmental Impact

Ethereum's Proof-of-Stake reduces energy consumption by ~99% compared to Proof-of-Work. \$SPACEXRP transactions and NFTs require no additional hardware mining. Energy impact is limited to Ethereum network activity.

Team

SpaceXRP is a community-driven initiative.

- Core developers and advisors remain pseudonymous but are known to SpaceXRP Labs Ltd.
- Smart-contract engineering is delivered by Web3Toolkit, an established third-party payment solutions provider.
- The project emphasizes transparency through audits, open communication, and clear disclaimers.

Token Economics

Fixed Total Supply: 100,000,000,000 \$SPACEGRP

Token Allocation:

- **Project Treasury: 30% (30,000,000,000)**
- **Marketing: 25% (25,000,000,000)**
- **Missions: 15% (15,000,000,000)**
- **Airdrop: 15% (15,000,000,000)**
- **Liquidity: 10% (10,000,000,000)**
- **Staking: 5% (5,000,000,000)**

Presale: Conducted on the official SpaceGRP site via secure widget. Purchasable in ETH, BNB, USDT, USDC, or bank card.

Claiming: Tokens claimable post-TGE to wallets used in presale. Best Wallet integration simplifies buy, track, and claim flow.

Listing: Immediate Uniswap v3 listing post-presale. CEX discussions are in progress.

Staking: Early adopters can stake \$SPACEGRP during and after the presale for dynamic (non-guaranteed) rewards. Pool distributions will last up to one year. Withdrawals are subject to 30-day vesting.

Issuer Information

Issuer: SpaceXRP Labs Ltd. (incorporation in progress)
